

WALTER R. FERGUSON, WAR VETERAN, BURIED WITH MILITARY HONORS

After a long and painful illness, and at the early age of 24, there passed away, at the home of his parents, Mr. and Mrs. A. Ferguson, their son Walter Robert, who died of tuberculosis, contracted while on active service during the great war.

Walter, who previously was in the Bank of Commerce, Macleod, enlisted in December, 1915, in the 137th Battalion, in Calgary, in which he remained during the period of training on this side, but upon arriving in England he and his brother, George, were transferred into the 49th in the fall of 1916. In the month of November or December of that year he was sent over to France, but he did not remain long as he contracted trench fever and was sent back to England, where he remained until his recovery. In August of 1918 he was attached to the 31st as a signaller, and he stayed with this regiment until the end of the war. He was at Amiens on the memorable 8th of August, when the British made their big drive. He was also at Arras, Vimy and at Verdun. In one of the latter engagements he was severely gassed, which laid the foundation for the insidious disease which finally proved fatal. After the signing of the Armistice he went with his regiment into Germany, enduring the long and heavy marches connected with the occupation of that country.

He landed back in Canada about the middle of July, 1919, war wrecked and shattered. He stayed at his home for about two weeks, when he became a patient in the Belcher Hospital in Calgary. He was only there a short time before he was transferred to the Fort Qu'Appelle Sanatorium in Saskatchewan, where he remained for two months. After leaving the Fort Qu'Appelle institution he returned to Calgary and remained there until the end of April, 1920, when he was again compelled to go into hospital. This time the medical authorities sent him to the sanatorium at Frank, where he remained until July 9th, ten days ago, when he was brought home to Macleod to die, and he passed away peacefully early on Monday morning, surrounded by his wife, who was Miss Bertha Carrow, daughter of Major Carrow, of Kamloops, and to whom he was married in April last, his mother and father, and brothers and sisters. His pastor was the Rev. J. Kennedy, of the Presbyterian Church, but during the latter's absence from town he was visited by Rev. W. A. Lewis, of the Methodist Church.

The funeral took place on Tuesday afternoon, and the deceased was buried with full military honors by the comrades of the Macleod G. W. V. A., under the direction of Capt. J. S. Lambert. The veterans assembled at the house, where the casket was placed upon a gun carriage kindly furnished by Inspector Macdonald, of the R.C.M.P., over the casket was spread the Union Jack for which the deceased had suffered and died.

Immediately preceding the casket was the firing party under the direction of Comrade J. Ridley, and the procession moved off at slow march and reversed arms to the Presbyterian Church, where the service was held, conducted by Rev. W. A. Lewis. At the conclusion of the service the congregation stood at solemn attention whilst the "Dead March in Sam" was being played upon the organ by Mr. F. Morris, who acted as organist for the occasion.

The body was once again placed upon the gun carriage and conveyed to the Union Cemetery, followed by a large number of sympathizing friends. Upon arrival at the cemetery the firing party silently took their places and every soldier stood at attention while the committal sentences were being read and the body lowered into the grave. When the last words of the minister had died away Comrade Ridley gave the word of command and three volleys were fired over the grave, and Bugler Edgar sounded the "Last Post" over their departed comrade.

There were many beautiful floral tributes, including those from deceased's "Devoted Wife," "Mother and Father," "Brother Jim," "Edith and Helen," Miss Ada Benson, J. W. Macdonald, Miss G. Sanderson and Miss Heap, Mrs. N. S. Scott, Mrs. L. C. McBride, J. Allen and the Macleod G.W.V.A.

The pall bearers were Comrades C. McGladdery, T. W. Whitefoot, G. H. Scougall, J. Gardiner, C. Cowan and J. Bremner.

DEATH OF W. M. McDOUGALL

W. M. McDougall, who was an old time resident of Macleod passed away at the General Hospital, Calgary, on Monday, June 12th, from heart failure. The deceased gentleman was well known in Macleod, and for some time was chief of police for the town. About three years ago he moved to Calgary where one son is member of the Calgary police force. He is survived by one other son and two daughters, Mrs. Campbell having died about three months ago.

MACLEOD FAIR THIS YEAR TO BE BEST IN SOCIETY'S HISTORY

At the meeting of the directors of the Macleod Agricultural Society on Saturday last some of the final arrangements were made to make the fair this year the best in the history of the society. In spite of the lateness of the season it is expected that the exhibits will be away above the average. The prize list for stock, produce and fancy articles will total upwards of \$7000, and there is an attractive program of horse racing events. Capt. McCall, the celebrated aviator, of Calgary, has been engaged to give an exhibition of stunt flying. Capt. McCall needs no introduction to the people of Macleod as his record as an exhibition flyer is well-known to all the people of the district. During his stay in Macleod Capt. McCall will be open to carry passengers.

Over \$1,000 is being divided among the various horse racing events for running, jumping and trotting.

There will also be a big auto procession on the second day when four prizes will be given for the best decorated cars. There will be a band in attendance each day, in fact, the management are doing their utmost to make this fair the best ever.

Most of the stock judging this year will be in front of the grand stand, where the committee are erecting new judging rings so that the patrons will have an opportunity of watching the awards being placed whilst sitting comfortably in their seats.

The membership tickets this year will be \$1.50, but they will admit the holder to the grounds at any time during the two days of the Fair, going in and out as you please. This is a great convenience and every person should avail themselves of this privilege.

Entries for stock and other exhibits should be in the hands of the secretary, R. J. E. Gardiner, not later than Saturday, July 31, and the entries for the horse racing events should be in the hands of G. H. Scougall before Tuesday, August 3rd, but don't leave entries until the last day. And positively no entries will be received after the dates mentioned above.

Don't forget the dates, Wednesday and Thursday, August 4th and 5th.

MID-JULY CROP REPORT

Conditions in crop and live stock in mid-July are in line with the forecast of the early part of the month. Warm weather had set in at that time following a period of plentiful moisture. In contrast with the situation in the previous two weeks a suitable condition of fine warmth is prevalent throughout the province, but there has been no interruption of adequate showers of rain to keep the crop in an absolutely good condition. The driest area for the previous period was in the district north of Lethbridge. The whole of Southern Alberta received on July 4th a night's steady rainfall totalling in most places about two inches. This shower is one of the outstanding features of the past fortnight and has had the effect of leveling up and correcting some of the inequalities of moisture distribution. Good rains have fallen in the centre and north.

The Cutworm Trouble is About Spent. The grasshopper area has increased since last report. The parts of the province affected are strips north, south and west of Lethbridge, points along the Macleod and Calgary line, particularly around High River, points along the C.P.R. for one hundred miles east of Calgary, and an outbreak at High Prairie. Hoppers have appeared at Monitor also. The extent of damage is not great on the whole but has been sufficiently serious to affect single farmers with considerable losses.

There have been a few small areas visited by hail—the principal one being east of Macleod.

The prospects for heavy crops of hay, roots and garden products are good. Potatoes were a little slow in starting but during the past ten days have improved remarkably. Taking the province as a whole the situation is better than it was two weeks ago by reason of the gain in growth through the accession of warm weather and the occurrence of rains.

Live stock conditions are improving but beef and stocker market does not look attractive to those farmers who have paid sixty dollars a head for feed to bring their stuff through the winter.

In order to overcome temporarily the eastern coal shortage it is suggested that manufacturing plants close down for a couple of weeks. That would no doubt save coal, but the monetary loss due to the shut-down would be far greater than the value of the fuel saved. The trouble with the people of the east seems to be that they have become so used to being served with fuel by Uncle Sam that they have no idea of looking elsewhere for their supply. —Calgary Herald.

MACLEOD FARMERS' NAME DELEGATES AT POLITICAL CONVENTION

There was a fairly good attendance of farmers at the U.F.A. meeting on Saturday, afternoon, when several items of importance were up for discussion—such as irrigation and the coming Political convention to be held in Macleod on Wednesday, July 28th. With reference to this convention the discussion centered around the question as to whether it should be turned into a nominating convention. Several members were of the opinion that owing to present unsettled conditions in political affairs that the candidate for this constituency should be elected. Others were for deferring the nomination to a convention called expressly for that purpose. Upon the question being put to the vote it was decided to ask the convention to take no action towards naming a candidate at the present; however, if the convention decided to make it the occasion for selecting their candidates the Macleod delegates were to govern themselves accordingly. The following were elected as delegates to represent the Macleod local: H. Mackintosh, W. H. Shields, A. R. McFadden, R. Nihill, J. L. Fawcett, A. V. Harris, W. J. Glass, Norman Grier, John Smith, Z. La France, A. McNair, R. T. McNichol, J. Horner and Rev. W. A. Lewis as alternative.

It is likely that there will be over 300 delegates in the town that day and the Macleod local is anxious that there shall be sufficient accommodation for them on that day, and if the convention does turn out to be a nominating convention it may be that it will extend over two days.

PLAIN TRUTHS ABOUT IRRIGATION

Principal Bracken, of Manitoba Agricultural College, told the soil conservation commission some plain truths at the gathering of that body in Winnipeg the other day. He made two points which should be carefully considered by Alberta legislators. One was with respect to the conservation of the future of the state and in this connection he figured that it was the duty of the state through government and not of the individual to take the initiative.

We have always believed this but it has never before been put in this clear, straightforward way to us. While theoretically we look to the government, provincial or Dominion, for leading in everything the fact is that for the most part leading comes from the individual. Governments, which are supposed to lead, spend most of their time seeing just how far they can stay behind the urge of public opinion with safety to themselves. We have an illustration of this in the attitude of the Alberta government with respect to irrigation in the south country.

Another point made by the Manitoba professor was that the wealth of a dry country is not determined by the amount of land there or the amount of water fall, but by the amount of water stored. People who live in Southern Alberta will understand the truth of this statement. The strange thing in this connection is that the government of Alberta does not seem to have seen the point. Given sufficient moisture we know that the dry lands in Southern Alberta can not be equalled for productivity anywhere. The area of this dry land is great enough to make it an important consideration. A very considerable area of it is irrigable and if irrigation were undertaken the result would be a tremendous increase in the wealth of the province. Opportunity offers for the carrying out of a comprehensive irrigation project. Yet the government hesitates. It is an incomprehensible situation. —Calgary Herald.

MACLEOD BASEBALL BOYS DEFEAT COALHURST

Oh you boys! Oh you babes! What are you putting up against us now? These and similar taunts were flung in a perfectly good natured manner at the comparatively youthful team that Macleod put up to face the stalwarts from Coalhurst last Friday evening. Our local boys were not a bit behind in the epithets which they returned to their tormentors, calling their tormentors choice and elegant names, reminders of the color and character of their occupation. Alas for the valiants from the Coal Town, the "babes and the boys" gave them such a bruising that all their courage evaporated before the game was half over and Macleod's worthy pitcher, Jesse Johnson, had the satisfaction of pitching a shut-out game.

Our boys certainly did play well. There was some real smart play and few errors. The fielding was all that could be desired, especially that of Kirk and Ferguson, who made some remarkably good catches. Somehow or other the Coalhurst boys could never get beyond second base and very few of them got beyond first, yet they were good sports. The game finished up 8-0 in favor of Macleod.

INDIAN WOMAN TELLS STORY OF BUFFALO BONES

"The days of the Buffalo were grand days," so said the oldest local Indian woman, who talks of the Indian hunts after the buffalo when they roamed the prairies at will, when they were monarchs of all they surveyed, when they had the right of way on the broad prairies, when their number was so great they could not be counted. "These were the days when we had plenty to eat, fresh buffalo meat all the year around, and pemican when we asked for it. These were the days when the trader, the white man came, and traded for our robes, we took the prices they offered us, and we were all satisfied. We did not know the value of the animals, as we slaughtered them by the bunch, we shot them for the fun of shooting, when our friends came to visit us, and we wished to entertain them, we would put on a big drive. We dug a large pit at the edge of cut banks, and would round up a large bunch of buffalo, and drive them into the pit, then allow our friends to shoot them. It was the most killed out of ten shots, after we killed the balance, and took only the skins, the bodies were allowed to rot. The bones the Indians are now digging are from some of these pits. They were along this river, and some other streams, where there was good banks to drive them over. That was many years ago, I cannot tell you the year, but I was a little girl, and my father told us about it since."

At the present time the Blood and Peigan Indians are digging bones from the south bank of the Old Man River, just west of Macleod, and selling them to dealers who in turn ship these bones East. Already several thousand dollars have been paid out for these bones to the Indians.

DRUMHELLER MUNICIPAL HOSPITAL

The municipal hospital at Drumheller is the most important health institution established in any of the towns of Alberta up to date. Its formal opening recently was the most important event in the history of hospital development in Alberta, as this is the largest and finest public hospital built in this province as a strictly municipal undertaking. If the provincial department of public health had accomplished nothing else except the successful organization of this hospital district, it would have justified its existence.

The people of Drumheller, the farmers of the district and the miners have co-operated in the most admirable manner and the preliminary negotiations were so satisfactory, that doubts for the success of other farm and city hospital combinations have been removed and an example has been set which will encourage similar enterprises in other mining and farming communities in this province. The new hospital will serve the special needs of each class of workers in a very complete way and the burden of financing has been equitably apportioned among the three classes of taxpayers without strife. Although the hospital will not be entirely free, the scale of fees is so low as to be nominal, the greater part of the expense being spread over the entire community. It will be governed by a board responsible to the electorate, under the general supervision of the provincial minister of health. The maximum accommodation of the institution is 65 beds. It has a fine surgery department, which is especially necessary in a mining district, with nearly one per cent of industrial casualties annually; excellent accommodation for maternity cases and all the other requisites of a properly equipped hospital of this size.

The organization of this district was the most important single achievement of the late Hon. A. G. Mackay, who was intensely interested in the working out of the many problems involved. But without the earnest and harmonious co-operation of the people of the district, the minister could not have accomplished anything. This is a very significant evidence of changing conditions in the Drumheller valley, that the people themselves got together in this remarkably successful manner.

Coal miners' unions, coal operators, townspeople and country people have displayed a wonderfully fraternal spirit in jointly shouldering the burdens entailed in establishing such an important institution.

Next to this display of harmonious class relations, the most significant thing about this institution is the entire absence of charity in the old-fashioned, humiliating sense. The hospital is not a monument to the philanthropy of a few wealthy operators, nor the affair of a handful of exclusive townspeople; it is a monument to community enterprise in which all persons and classes share equally, the benefits and the responsibilities. It indicates changing class relations and a progressive spirit among all citizens of this remarkable valley. It indicates what can be done to ameliorate social blemishes when people have established a get-together spirit. —Morning Albertan.

EVIDENCES OF MANY GOOD CROPS IN THE VICINITY OF MACLEOD

Hunter Bros., of the Porcupine Hills, have on exhibition in Delatash & Whites office a sample of bromegrass five feet high and this is a fair sample of a 40 acre field.

Graham Bros., of Mud Lake, have an excellent stand of wheat, a sample of which can be seen in H. C. Winter's office. They have 400 acres all well headed and anticipate a good crop. They report that crops generally are very good in the Mud Lake district.

Stewart and Sons also have about 400 acres of good looking wheat on their farm at Pearce, promising an average of 30 bushels to the acre. They have also a fine crop of alfalfa, and it is wonderful how all kinds of field crops have come along since the rains. Frank Watson, J. G. Tersteeg, Kenneth McDonald, Mr. J. Zoeteman and W. Barnaby all report that prospects are fine.

REORGANIZING THE GOVERNMENT RAILWAYS

WINNIPEG, July 16.—Shifting in personnel through the reorganization and amalgamation of the Canadian National Railways, the Grand Trunk and the Grand Trunk Pacific, was indicated by Hon. J. D. Reid, minister of railways and canals who arrived in Winnipeg today. Mr. Reid further indicated that the amalgamation would not interfere with the superannuation rights of any of the men on the two systems. He discussed construction, the future of labor supply and touched on the necessity for higher railroad freight rates.

"It is impossible for me to go into details of amalgamation," said Mr. Reid. "I have not seen Mr. Hanna, nor have I been over the western lines. I have no report of the situation on which to base any statement of the solution of the problems which would confront us."

"So it would be impossible for me to talk of actual changes in personnel of any details of that sort. However, in 22,000 miles of railway, with hundreds of more miles being built, there is going to be no difficulty whatever in taking care of the men now with both systems."

In discussing the opening up of new territory, Mr. Reid said: "We are building lines now and there are more lines to be built. Much construction was halted by the war. Construction now is difficult because of high cost and scarcity of labor. But I do not really think that is going to handicap us for long."

"There has been talk of men from the farms being used for railroad construction work. It can not be done. It takes foreign labor, used to that sort of work to handle rails and make roadbeds. It will not be long, I am sure, before we will see in Canada enough foreign labor of the kind that railroad construction work must use to make rapid strides in railroad work."

Are Consolidating
Announcement of the first physical sign in Winnipeg of the amalgamation of the Canadian National Railways and the Grand Trunk Pacific system was made today. From this evening the freight terminals and transfer companies of the two systems will be consolidated directly under the jurisdiction of General Agent A. W. Warner. It is stated unofficially that the down town ticket offices of the systems would be consolidated from August 1. —Calgary Herald.

TIDE OF IMMIGRATION STARTS IN EARNEST

MONTREAL, July 19.—The publicity department of the Canadian Pacific Railway stated that the great European invasion Canada has been experiencing since shipping was released is very general and is drawing immigrants from a large area. Every continental country, ally and neutral, is bringing its quota to the persistent stream. Every steamer sailing from European ports for the Dominion is crammed to capacity and the class of the new Canadian settler was never higher nor of a better type.

The vessels of the Canadian Pacific Ocean Services alone handled 26,126 passengers in the months of April and May and of this total 15,350 avowed their intention of settling in the Dominion and making their homes here.

A party of big husky Hollanders who travelled out to Canada under the escort of the Canadian Pacific Railway, went through to Alberta, where they are taking farms. The majority of them were accompanied by their families and the party represented among them capital to the extent of \$50,000, which is being put into western land. The Hollanders are all expert farmers. —Lethbridge Herald.

For the first time in the history of the America's cup race, challenger and defender lay today in the same dry-dock awaiting official measurement.

ALBERTA WHEAT CROP ESTIMATED AT 70,000,000 BUSHELS

Three hundred million bushels is the estimate at present placed upon the wheat crop of the three western provinces by J. M. Cameron, general superintendent of the Alberta division of the C. P. R., who returned to Calgary Monday morning after a close inspection of some portions of the province. Alberta's quota, he said, in the course of an interview with The Calgary Herald, would be somewhere about 70 million bushels.

"Of course it is too early yet to make a very definite estimate," he stated, "but with anything like favorable weather there should be no doubt that Alberta will certainly come up to the figure I have mentioned."

On his last trip Mr. Cameron covered the country from Swift Current to Brooks and back to Medicine Hat, and from the latter district to Taber. In all these parts the crops are looking in splendid condition and although there might be sufficient moisture to carry them to harvest still further rain at this stage will be beneficial.

Mr. Cameron has brought back with him some very tangible evidence of the present Alberta sunshine. His face is as badly pealed as if he had returned from some tropical country. —Calgary Herald.

FACTS ABOUT THE GREAT YACHT RACE

The Prize—The cup, worth, in actual cash, about \$500—now held by the New York Yacht Club.

The Yachts—Shamrock IV, owned by Sir Thomas Lipton, of the Royal Ulster Yacht Club, of Belfast, Ireland, designed and built by Chas. E. Nicholson at Gosport near Portsmouth, Eng. Skipper, William P. Burton, and carrying a crew of 40.

The Resolute, owned by R. W. Emmons and others of the New York Yacht Club, U.S.A., designed and built by Nat Herreshoff at Bristol, R. I. Skipper, Chas. F. Adams and carrying a crew of 35.

The Winner—will be the yacht that wins three out of five races, but the course must be covered in 6 hours.

The course consists of a tract 30 miles in extent, and may be either 15 miles to windward and return, or over three sides of a triangle.

Up to the present time the result of the race has been The Shamrock IV declared the winner of the first race, having completed the course within the time limit. The Resolute withdrawing owing to an accident. The second race had to be abandoned owing to the lack of wind.

MACLEOD'S FIRST EDITOR PAYS A VISIT

Judge C. E. D. Wood and Mrs. Wood, of Weyburn, Sask., are visiting Macleod this week, stopping over on their motor trip to the coast.

This is their first visit to Macleod for several years. Judge Wood was the editor of the first newspaper to appear in Macleod, which was published in the year 1882, and was known as the Macleod Gazette.

This newspaper was the third to be published in the North West Territories, which is now the provinces of Saskatchewan and Alberta.

The Battleford Herald was the first to appear, followed by the Edmonton Bulletin, and then came the Macleod Gazette.

Like other editors he did not find the pathway strewn with roses, so he took up the study of law with the now Chief Justice Haultain, and upon completion of his course he joined Mr. Haultain in his office at Regina, where he stayed for some time. Mr. Wood was afterward appointed Deputy Attorney General for the Province of Saskatchewan, and in 1905 ran as a candidate for the provincial legislature, but was defeated. He was then appointed Judge of the District Court for Weyburn, where he now resides.

Judge says he is delighted to have the opportunity of re-visiting Macleod and he sees many improvements since the old days.

MEN OF HUMBLE ORIGIN

Much stress is laid in certain newspapers on the humble origin of the two candidates for the American presidency and the new premier of Canada. It is pointed out that the whole three owe their success wholly to their own efforts and nothing to bequeathed wealth or inherited influence. They were "well born" only in the sense that they came from good stock. But it isn't really worth while paying so much attention on this fact. It is the most common of commonplaces. The very exceptional thing is for a man born with a silver spoon in his mouth to attain a position of any influence in the life of this continent, as all students, of biography know. This is so obvious that one must be greatly mystified over the talk which he so frequently hears about "the governing classes." —Edmonton Journal.

WAR TROPHIES ARRIVE AT MACLEOD

One day last week there might be seen two of our doughty old-time warriors, J. Ridley and G. F. Pollard, proceeding from the rail-

CLUB BILLIARD ROOM J. R. MORRISON Prop.

Everything in best condition. Price \$4,700, half cash, balance to suit at 6 per cent. Sale subject to lease. Clear title. Neil McCaig. 20-3t

\$25 REWARD—\$5 EACH ANIMAL STRAYED—From Mud Lake, about July 1st, 1920, one bay mare, five years old, branded JY (Y upside down) on left shoulder. One black gelding, 7 years old, branded d_c

on right thigh. One dark gray gelding, 7 years old branded as above. One brown mare, 7 years old, branded standing sheep on left shoulder. One black mare, 8 years old, branded standing sheep on left shoulder. All above horses have short manes and tails. Reward as above. Information leading to recovery will be received by A. M. Carlsen, Woodhouse, Alta., or E. Adrian, Box 6, Macleod, Alta. 19-3tp

Have good pasture and water for 70 head cattle or horses. Terms reasonable. Inquire H. C. Winter & Co. 18-3t

MATERNITY NURSE—Open for Macleod and district. Terms moderate. Apply P. O. Box 129, Macleod. 12-3tp-tf

way station in charge of what appeared to be two formidable weapons of war. And maybe some of our worthy citizens have wondered what the advent of these weapons meant. But no one need become alarmed, they are not brought into our peaceful town because the authorities are fearful of some dreadful uprising, but that they may find a last peaceful resting place and serve as a reminder of the great struggle the nation has passed through and as monuments to the sacrifices our boys made "over there" in order to secure to us and to all men the liberties we so highly prize.

These two strangers that have made their sudden appearance to our town are two captive German guns, sent to the town by the Controller of War Trophies for safe and careful keeping. One of them is a 77 MM. or what is popularly known by the "Tommies" as a "whiz bang." They were fired so rapidly that you saw the shell explode before you heard the sound of its coming. The other is a 100 M.M. or 4.5 gun, which carried a much heavier shell than the other and had a longer range. These guns were captured at Amiens by the 31st Canadian Battalion—a Calgary Battalion—to which many of our local boys belonged. They were captured at that never-to-be-forgotten day, the 8th of August, 1918, when the British started the drive upon the Germans that was the beginning of the end.

In talking of that memorable occasion one of our local boys, who was there says that the whole thing beggars description. The preparations were so secret that even many of the British officers were not aware of what was being planned and certainly the Germans had not the faintest idea of what was being prepared for their benefit, and when on the fateful zero hour on the 8th day of August, our boys went over the top—they went over with such a force that they carried everything before them. In one day they made an advance of 25 miles into the enemy territory, and the Germans not knowing how far their own forces had retreated, were actually sending trainloads of reinforcements right into the British lines, only to be captured as soon as they arrived.

One of our worthy veterans goes so far as to assure us that he recognizes that 100 M.M. gun as the one he himself captured and one to which he found a German tied to the wheel—but of course there is no telling how far the imagination of some folks can stretch.

NEW ENGINE AT THE POWER HOUSE

There has been a peculiar sound floating over the night air, from the direction of the Power House, this past week, and folk have been wondering what it could mean. And so to enlighten the public of Macleod we would say that those mysterious sounds come from the new gas-burning engine that has been installed in the power house to take the place of the old steam engine that is now worn out.

Any person visiting the power house this past month would have found Engineer Pearson clad in a dirty shirt and overalls at work all day and far into the night, making the necessary changes. For Mr. Pearson, with only the assistance of the men at the plant has taken down the old engine and moved it out, rebuilt the concrete base, and installed the new engine. All this has been done without any noise and without any fuss and at a minimum cost to the town, for all the freight, the labor and the expense of installing the new engine has cost the town but little over \$1200, and great credit is due to our Town Engineer for the excellent and rapid way in which he has affected the change. The new engine was first started up last Wednesday and it is now gradually taking the full load. What it will save the town can best be estimated by the statement that for one day this week the new engine ran for 24 hours on \$7.00 worth of gas.

No senator holding office was ever elected to the presidency.

ALBERTA WILL HAVE THREE NORMAL SCHOOLS

SCHOOLS TO OPEN AUGUST 24th

With the opening of the fall term on August 24th next Alberta will have three teachers' training institutions. The Edmonton Normal will hold its sessions in the Highlands School where the short course was given last winter. The other schools will be held in Camrose and Calgary as usual. This means that all parts of the Province will be well served with teachers' training facilities for the session of 1920-21.

Province Divided into Districts Boundaries for the districts to be served by the schools have been set as follows:—

(1)—Edmonton: The City of Edmonton and all territory North and West of the North Saskatchewan River.

(2)—Camrose: All territory South of the North Saskatchewan River as far as the Southern boundary of Township 27.

(3)—Calgary: From the Northern boundary of Township 26 to the international boundary.

Application for Admission It is expected that the results of the Departmental Examinations in Grades XI and XII will be available by the first of August. Prospective students are urged to forward applications for admission at an early date.

Loans The loan policy of the Department inaugurated last year made it possible for more than one hundred additional teachers to take Normal training. This policy will be continued during the present year so that no qualified person need be debarred from securing a teacher's certificate through lack of funds.

A Course of Thirty-three Weeks All the Normal Schools will open on August 24th next and continue until April 15th, 1921. This will give opportunity for a school year of thirty-three weeks and at the same time allow the teachers to get into the schools early in the year. A large number of young people have already intimated their intention of taking this course and it is expected that all these schools will be filled.

LEGACY COMES IN A PECULIAR WAY

ST. JOHN, N.B., July 15.—A fortune of \$600,000 awaits Leveritt MacKenzie, a young Canadian war veteran, who is employed somewhere in Boston or its vicinity. When last heard of, young MacKenzie was on his way from St. John to Boston. That was in May, 1919. Since then, it develops, friends have learned that he has fallen heir to the estate of Captain D. B. Wilbur, of Hastings, England, under peculiar circumstances. MacKenzie went to England in the early days of the wars as a corporal in the mounted rifles of eastern Canada. While there he met Miss Helen Wilbur, with whom he fell in love. After his departure for the battle-fields of France, the two young people kept up their correspondence and when later he was sent back to England badly wounded, she visited him at Operton hospital. There she promised to marry him if he recovered from his wounds. She herself, however, died in December of that year. It was not long afterward that the father and only remaining member of the family, Captain Wilbur, was fatally wounded in action.

Corporal MacKenzie meanwhile was invalided back to Canada. When Captain Wilbur's will was placed in probate it was learned that MacKenzie had been bequeathed the sum of \$60,000 and a residence at Hastings, as the former fiancée of the captain's only child.

MacKenzie's relatives reside in New Brunswick.—Lethbridge Herald.

Sir Thomas Lipton is a real sport. He has spent millions in his endeavor to lift the American cup, and to date has failed, but so tenacious is his determination that he is said to have made financial provision in his will that the fight shall go on after his death in case he is not able to turn the trick during his lifetime. Success must finally come to so good a sport as this.—Calgary Herald.

BAWDEN'S BAKERY

NURSERY AND REST TENT AT MACLEOD FAIR

The Local Council of Women have arranged to have a nursery and rest tent at the Fair. Rev. W. A. Lewis is kindly providing the tents and Mrs. J. Horner will have charge of the nursery. A cup of tea will be provided for those desiring it. There will be no charge for the use of the nursery and rest tent and it is hoped that a number will avail themselves of the accommodation provided.

MISS ROTHNEY WINS HIGH PRAISE

Prof. Peluet, examiner in Oral French for the larger High School centres, states that he found the best work in the province in this department in the classes of Grades XI and XII, Lethbridge High School.

The teacher of this branch was Miss F. Rothney, M.A. (Aberdeen), daughter of Mr. J. Rothney, of Macleod.

Miss Rothney is a member of the Lethbridge Local of the A.T.A., a recent acquisition to the teaching ranks of the province, and an enthusiastic young teacher. Fellow-members of the A.T.A. will rejoice that Miss Rothney has secured this distinction during the initial year of her career here and wish her continued success.

FARMERS WILL NOT LINK UP WITH GOVERNMENT

WINNIPEG, July 13.—Formation of a Farmers-Independent group in the Manitoba legislature was decided upon today at a meeting of the newly elected members held here. After coming to the decision that it was advisable and necessary to form a definite organization of all members elected as independent farmers and as straight independents, the meeting adjourned until July 27, when a group leader is to be chosen. Today's meeting was called by W. McKinnell, member for Rockwood, who stated that he believed the adjourned meeting would result in the formation of a strong group under a recognized leader.

"We propose to give no pledge support to any other group in the house and will be strictly independent on all matters. The rumors that we are playing for cabinet representation have no foundation," said Mr. McKinnell.

DISTRIBUTION OF SEED RYE

The Provincial Department of Agriculture has undertaken the distribution of seed rye to meet the needs of those who have been robbed of their crop by cutworms and winds in Southern Alberta.

The Department in this distribution will deal only with those in unorganized districts. Others must be taken care of by the Municipalities in which they are situated. The Department has no authority to deal with any except those who have patents on their lands and who have not already gone past the amount of loan they can secure on advances of seed grain. The upper limit in quantity of grain is supplied in twenty-five bushels and the price is not yet known. This work is limited wholly to relief purposes. No one can take advantage of it except a farmer who has suffered loss of his crop through blowing or cutworms.

The relief will be conducted from Lethbridge and an official of the department will be put in charge. The office will be open by the 20th, of the month and will be in charge of Mr. A. W. Murphy and those who wish to get seed will apply to him. He will have assistants who will look after and scrutinize the applications and attend to the distribution. Affidavits to the effect that the party has suffered from loss of crop in either way specified will have to be taken by the applicant.

DISASTROUS FIRE AT COALDALE

J. B. Shimek's hay barn and prospective alfalfa mill at Coal Dale was totally destroyed by fire last night. Damage this morning was estimated at \$30,000. The I. H. C. had between \$3,000 and \$5,000 worth of machinery in the building. The building and contents were fairly well covered with insurance. The building was valued at \$10,000, and the contents at \$14,000 exclusive of the I.H.C. machinery.

Shortly after 1 o'clock this morning fire was noticed shooting through the roof of the structure. An alarm was sent to the Lethbridge fire department, and at the time of writing the department is still pouring water on a burning mass of hay. Water was obtained from a pond nearby. It was impossible to save the building in spite of the splendid efforts on the part of the Lethbridge brigade.

Mr. Shimek this morning states that he believes the fire started from heated hay. No plans have been made yet for rebuilding but if he does it will be a brick structure and will be specially constructed for use as an alfalfa mill.—Lethbridge Herald.

OPEN WHEAT MARKET AT \$2.50 OR UP

CHICAGO, July 14.—Plans for the resumption of trading in wheat futures commencing tomorrow morning were announced today by the directors of the Chicago Board of Trade.

The probable opening prices for December wheat varies from \$2.50 to \$2.75 in the opinion of traders. Deliveries will be quoted for December and March.

Members were notified that as the Lever Act continues in force until the termination by the United States of a state of war with Germany, the wartime supervision of contracts for future delivery in story by grade alone will be continued and applied to such trading in wheat. The directors authorized the executive officers to exercise such supervision under strict seal of secrecy with full power to order curtailments or adjustments whenever the public welfare or the best interests of the board of trade seem so to require.

Recognizing that the attempt to re-establish the open market is being made under abnormal conditions, the attention of members is called to the fact that responsibility for the market's conduct rests with them. The directors urge that there be every adequate protection behind every contract.

THE DEPARTMENT OF AGRICULTURE For ALBERTA

The Department of Agriculture for Alberta is distributing seed grain to those who have suffered from loss of crops by blowing or by the ravages of cutworms.

Relief is limited to unorganized districts.

AN INTERESTING SOUVENIR OF BAY'S 250th ANNIVERSARY

One of the most appreciated and abiding moments of the celebration of the 250th Anniversary of the Hudson's Bay Company is the book now being sent out from the London, Eng., office of the company.

In the introduction the Governor of the Company, Sir Robert Kindersley, says that the book does not pretend to be a complete history of the 250 years of the Company's existence, but an outline of the principle events which may prove of interest to a large number of people, especially to the Company's many friends in Canada. And it is because the volume before us is put up in such a readable and attractive form that it will accomplish the purpose of the Governor and Company of Adventurers Trading into Hudson's Bay.

The volume is splendidly illustrated with four beautifully colored plates, photographs of the Company's stores, both in past and in the present, and of scenes connected with its many activities on the prairie and in the forest and stream, and all into whose hands the volume will come will treasure it as a memento of the unique anniversary of a great business concern whose history is so closely interwoven with that of the Dominion of Canada as a whole, but especially with the history of the Great West.

THE SOUTH COUNTRY LOOKS GOOD

The correspondent of The Times took a trip this week out to Waterton Lakes, going by way of Ardenville, Ewelme, Glenwoodville and Hill Springs, and returning by way of the oil trail and Pincher Creek. On the way out the roads were very rough and they badly needed attention. The "Blue route" has now been finally located and marked—it should now be put in such shape that cars can travel over it with comfort. The road from Glenwoodville on into the Lakes is much better, and there is quite an improvement in the roads inside the park, in fact they are all that can be desired. Between the Lakes and Pincher Creek there is a good graded road and when the writer travelled over it, it was smooth all the way.

On the way out one passed some good looking crops, in fact one would hardly realize what a difference the recent rains have made. Along the trail between Ardenville and Ewelme we saw some good stands of wheat and rye and the prospects are that there will be a good average yield. There were also some good looking fields around Glenwoodville, but we saw several places badly infested with the stinkweed and mustard. Around Hill Springs there were some good fields of brome grass standing high and healthy. The crops on the Pincher Creek and Waterton trail never looked better, all the way out we passed heavy stands of grains and grasses; wheat, oats and timothy appeared to be in splendid shape.

Out on the range the cattle and horses were in fine shape, looking sleek and fat, with scarcely any trace of the hard seige they endured during the past winter.

All the creeks and rivers are high and one could not help regretting that no attempt has yet been made to store up some of this water and make it available to the farmers on the lower levels and so ensure them a reasonable return for their labors. It seems to us reasonable that Providence meant this country for irrigation because the months when the water is most needed on the land are the months when the rivers are highest and from the mountains eastward there is a natural fall of the land that should make most of it accessible to the water at the lowest possible cost. There is absolutely no reason why this section of the country should not be the most productive section in the whole of Alberta, if only some one could be found to tackle the problem in a common sense way.

MUD LAKE DANCE

The dance at Mud Lake School House was a decided success. There was a big crowd of men and maidens who spent a good time. Messrs. C. Edgar and Z. La France were floor managers and J. T. Doney's orchestra furnished the music. The ladies who were responsible for the arrangements wish to express their appreciation to those who contributed to the success of the evening.

FIRST BOAT BUILT IN MACLEOD

The first boat ever built in Macleod took to the water at 2 o'clock yesterday afternoon, when the "John Stewart" was launched by the McLaren Lumber Co., to be used in dredging operations down at the river. She is 40 feet long and 20 feet wide and built of 2 inch lumber. She is named after the chief engineer in charge of the operations.

Don't forget the big Irrigation Convention to be held in Lethbridge July 28-30. Every farmer should be there. The delegates from the Macleod U.F.A. are A. R. FeFadden and Hugh Mackintosh.

A Paris physician says premature baldness is due to teeth trouble.

FARMERS MAKE NO RASH MOVES

WINNIPEG, July 14.—The Canadian council of agriculture concluded the business of its annual meeting tonight by deciding, after long discussion, to take no further action towards political organization than that provided for last January, by which organization is carried out on a provincial plan.

The principal subject of debate was whether there should be a central coordinating committee to take charge of political activities, but the discussion ended without any decision in this direction.

At the morning session a formal resolution was passed requesting the federal government "to re-appoint immediately the existing Canadian wheat board for the purpose of marketing the wheat crop of 1920."

Nova Scotia Comes In

Norman Lambert, secretary of the council, said that the present meeting of the council was the biggest ever held. An application had been received from the United Farmers of Nova Scotia for membership, so now the council is composed of representatives of the farming organizations of Alberta, Saskatchewan, Manitoba, Ontario, New Brunswick and Nova Scotia.—Morning Albertan.

WINNIPEG GRAIN EXCHANGE OPENS

WINNIPEG, July 17th.—Resumption of trading in wheat on the Winnipeg exchange will begin Monday, after three years' suspension. Much excitement was displayed by members when the news came in from Ottawa yesterday afternoon. There was a hurrying and scurrying all over the building. In spite of great expense most of the members have kept their regular staffs during the suspension but many have done so at actual loss waiting for normal wheat trading again.

"Three-Dollar Wheat"

At the meeting of the agricultural council in Winnipeg Monday, in conference with exchange members and millers, the sentiment was overwhelming in favor of open market. The fact that the October option in the States opened around \$2.72 last Tuesday has caused many to hope for at least this price here, if not higher. Three dollar wheat is the slogan all over the west and lots of the agriculturalists expressed the view Tuesday that it might even pass this figure. Millers have a quantity of grain and flour in storage, purchased through the wheat board at between \$2.30 and \$2.50. This means a huge profit for this branch of the industry for, of course, these institutions will not sell flour cheaper than they know they can buy wheat in October. But on the whole everyone connected with the wheat and flour industry is pleased at the resumption of normal trading.

A Broker's Harvest

"It means millions to exchange members," was the way one leading broker put it. "The dealers are hungry for trade after being stopped for so long," he said. Machinery for trading is in readiness for the exchange has anticipated ever since the United States control was abandoned that Canada would have to follow in line. The warning from Ottawa, that the government stands prepared to put the breaks on if prices are put up artificially, has been accepted by members as evidence that the panic conditions which were worked up on the exchange here in 1916 will not be permitted. Then a real corner existed and nothing but government control interference prevented a number of shorts from being ruined.

So no corners or attempts of this character are expected when trading is resumed. The United States is expected to be an active bidder for much of the Canadian hard variety.

TREE PLANTING CAR IN MACLEOD

The "Tree Planting Car" of the Canadian Forestry Association which has been stirring up great popular interest in its Western tour is due to arrive at Macleod, Alberta, July 24th, 1920, and will remain for one day.

In charge of the car is Mr. Archibald Mitchell, the well-known authority on tree planting under Canadian prairie conditions. Mr. Mitchell plans while here to give several of his instructive and entertaining talks on how to establish tree belts and what advantages they bring. It is hoped to have a special meeting for the school children.

The Tree Planting Car is entirely educational in purpose and is equipped as a motion picture lecture hall. Mr. Mitchell has some excellent movies on the subject of planting and these will be shown both at the car and, if it can be arranged, at some local auditorium.

The Canadian Forestry Association is responsible for the whole enterprise which aims to develop public interest in the value of trees not only to beautify our farm homes, but as a preventative of soil drifting and the other damaging effects of prairie winds.

A hearty invitation has been extended to every citizen to visit the car, see the movies and hear Mr. Mitchell. It is a unique event that is attracting country-wide attention. Lectures will be held at 3 and 8 p.m.

CHIEF LAWSON CLEANING UP FERNIE

City Chief Lawson, accompanied by Constable Dunlap, yesterday made a sudden visit to the King's Hotel and searching behind the bar obtained a bottle alleged to contain intoxicating liquor. From there they paid a similar visit to the bar of the Fernie Hotel, and again a bottle was found. Information will be laid against Mrs. Anna Mills in whose name the licence of the King's Hotel was granted, and against Mrs. Alice Wyatt, licensee of the Fernie. The authorities appear to have decided to strictly enforce the Prohibition Act in all local hotel establishments, and while it is understood that in each of the above cases the charge will only be that of having intoxicating liquor in other than a private dwelling, thereby limiting the fine in the event of accused being found guilty, it will also be a salutary warning to other places that contravene the Prohibition Act and Beverage Licence By-law.—Fernie Free Press.

WEDNESDAY, JULY 21, 1920

THE PASSING OF THE WHEAT CONTROL BOARD

Since the government has decided to abolish the wheat control board there have been several expressions of opinion on the part of individuals and of some of the locals of the U. F. A.

As these individuals and organizations are composed of the men growing and selling the wheat their opinion should be worth something.

So far as the farmers themselves are concerned they are perfectly satisfied with the work of the board, and indeed if their wishes are consulted the board would have continued its operations. President Wood of the U. F. A. is of the opinion that on an open market the farmers will not get the full value for their wheat, and that there is likely to be a very large spread in the price realized by the farmer and that paid by the consumer when he buys his flour. Again President Wood is convinced that wheat cannot be handled as economically in the open market as by a centralized purchasing agency. The farmers themselves have found that the principle of government control works so much to their interests, that many locals are sending in strong resolutions to the government asking for the continuance of the system. The one great benefit accruing to the farmer under the government supervision was that he was not compelled to dispose of his crop while there was a glut on the market. He took his grain to the elevator, and received a fixed sum—and a participation certificate—and the wheat passed into storage under the control of the government—to be sold as occasion demanded—and the difference in the price at the elevator, and that which was realized by the final sale, was returned to the farmer by means of his participation certificates. In other words under government control the farmer got every dollar there was in the crop, and the speculator was eliminated.

Of course there have been a few dissatisfied farmers. There always will be no matter what system is adopted, but upon the whole the Wheat Control Board worked to the best interests of the farmers by ensuring them a fair and guaranteed price, and by protecting them from an unprotected market engineered by speculators.

Mexico's national debt is about 540,000,000 pesos (\$270,000,000).

DEPOSIT AND PROPORTIONAL REPRESENTATION

There was one abnormality in the Proportional Representation system which was adopted in the recent Winnipeg elections, and that was the retention of the objectionable election deposit.

The Albertan believes that the deposit is an outrage in any system. The man who has a vote has the same right without any punishment to become a candidate for an elected office.

But under our old system of voting the minority candidate was a source of danger, because his candidature might, and often did, result in another minority candidate being elected. For that reason there was some excuse for discouraging many candidates in an election.

But with Proportional Representation, the minority candidate can do no harm. He cannot change the election. For that reason there is no good in trying to prevent him from becoming a candidate.

When we once get into ways that divert from democracy we are apt to do many unreasonable acts before we get on the right road once more.—Morning Albertan.

CANADA REVERTS TO OPEN WHEAT MARKET

OTTAWA, July 16.—The government has decided that the present Wheat Board will not function insofar as the wheat crop of 1920 is concerned. The marketing of this crop will revert to the usual and normal methods of pre-war times.

The government will, however, carefully watch the conditions outside of Canada and will exercise the right to proclaim the enabling legislation of last session if conditions make it necessary so to act in the public interest. From the present point of view, it is hoped that no such action will be found necessary.

Legislation passed a few weeks ago enabled the government to constitute a Wheat Board, in continuance of the present Wheat Board. The Wheat Board, under the bill, was to have well defined powers and could be called into operation by proclamation in the Canada Gazette, should circumstances make it necessary.

Foster's Statement

In announcing the decision of the government, Sir George Foster, minister of trade and commerce, this afternoon, made the following statement:

"The government has given every consideration to the course to be pursued in marketing the wheat crop of Canada for 1920. As is well known a bill was passed at the late session of parliament enabling the government to constitute a Wheat Board with well-defined powers, which board could be called into operation by proclamation in the Canada Gazette should circumstances make it necessary.

"The reference of the government has been for a return to normal methods of grain marketing as soon as such appeared to be warranted by conditions abroad.

Factors Which Decided

"The three principal factors which last year decided the government to establish the Wheat Board were these:

"(1)—The fact that in Europe all buying of wheat was controlled by the various governments, either separately or in concert and that the buying by our principal customers, Great Britain, France and Italy, was carried on in concert. There was accordingly, virtually one purchaser, resulting in the practical elimination of competition. There was reluctance to enter upon purchase negotiations with consequent danger to the early movement of wheat during the navigation season.

"(2)—Financial negotiations which necessitated advances and credits by foreign governments and which could only be adequately made by governmental agencies in Canada, in order to insure prompt and continued movement of wheat from the commencement of harvest.

"(3)—The control by the United States of the purchase and sale of wheat and the fixation of prices thereof together with an embargo on

imports of both wheat and flour.

Emergency Passes

"These factors either do not exist or are not in force to the same extent at the present time. From the best information available it would now appear that while as far as can be ascertained, European buying will be in a greater or lesser degree controlled by the governments of practically all countries in Europe dependent upon imports of wheat, there does not seem at the present time reason to believe that the purchase by the various governments or governmental agencies will not be made independent of each other, both as to transport and purchase, thus constituting conditions of competition that resulted in a fair market value being obtained for the Canadian crop.

"The United States has controlled the market in grain and flour and the exchanges are now open for trading in December and later options, and there is no longer any embargo upon imports of wheat or flour. All the indications, therefore, are that the marketing of grain and its products in the United States will resume normal methods and flow in the usual channels.

"It must be remembered, however, that the United States have legislation under which control can be brought into effective force if at any time their government were to decide that national interests demanded such action.

Back to Normal Times

"Under the circumstances above

set forth, the Canadian government has decided to take no steps at present, to proclaim the enabling act, which means that the present wheat board will not function insofar as the crop of 1920 is concerned, and that the marketing of this crop will revert to the usual and normal methods of pre-war times. The government will, however, carefully watch the conditions outside of Canada and will exercise the right to proclaim the enabling legislation of last session if circumstances made it necessary to act in the public interest.

From the present point of view the government hopes that no such action will be found necessary."—Calgary Herald.

BILLY DID

She was a winsome country lass,
So William, on a brief vacation,
More pleasantly the time to pass.

Essayed flirtation;
And as they strolled in twilight dim,
While near the time of parting drew,
Asked if she would like to have from him

A parting billet-doux.

Of French this simple girl knew naught,
But doubting not 'twas something nice,
Upon its meaning thought;

Then, in a trice,
Upward she turned her pretty head,
Her rosy lips together drew,
For purpose plain, and coyly said,

"Yes, Billy, do!"

Sequel—And William did.

AUCTION SALE FURNITURE

Having received instructions from Mrs. C. K. Underwood, who is leaving Macleod, I will sell by Auction at her residence on 20th Street (between 1st and 2nd Ave.), on Saturday, July 24th at 3 p.m. the surplus

Gillette Safety Razor

The Shaving Service for Every Man—Everywhere

Prosperity!

YOU would say that the man pictured here was well-to-do. His smart appearance gives an air of Prosperity that is a distinct asset in his business and social life.

Now imagine him with a couple of day's growth of beard! Who now would guess his prosperity. He no longer holds his head so erect!

Yet a few swift strokes of his keen-edged Gillette, and he is ready to face the world again—sure of respectful attention!

Are YOU depriving yourself of far more than you can imagine by delaying the purchase of your Gillette Safety Razor?

Do you realize that there is something more than easier shaving, time saved, and a smoother chin coming from your investment of \$5.00 in a Gillette?

Look prosperous—it is the first step towards being prosperous!

NO STROPPING—NO HONING

Make a point of asking your town dealer to show you some GILLETTE Safety Razor Sets, including the new "Big Fellow" at

\$5.00 the Set

REACH & CO.

A party of young ladies were talking in our store and complaining about the Luxury Tax with other axes, also the dreadful increase in the cost of living and dressing up-to-date. The conversation drifted to the Exchange Rates with the fluctuations of the price of "inconsequential" on the New York Exchange. Their arguments on various American topics got quite heated and the climax was reached when they criticized the Senate's action on the Peace Treaty and their unwarrantable meddling in the Irish Question just for paltry political gains. One young lady in her excitement picked up a dirty looking piece of cheese cloth, saturated with O-Cedar oil, that we use for polishing the wood-work, counters, etc., and waving it frantically to and fro said, "Wait till we women are properly represented in congress, parliament or governing bodies, then we will clean the political horizon, and bring order out of chaos. We will give the men their beer and smokes, while we do the governing. This prohibition question is a rank failure. It is driving people to drugs, wood alcohol with other numerous poisons thrown in. 'Personal Liberty'—Rot!—there is no such word in our modern language. We are white slaves governed by a lot of schemers." Then taking the sweet smelling duster, aforesaid, she wiped her streaming face. Letting out a yell, saying "You dirty creatures, one of you sneaked my handkerchief and put this in its place. I'll never forgive you." One girl said "Oh shucks, you came away in a hurry and put your oiling rag in your pocket." One said, "No, Dearie, there is your in your pocket. You picked that off the counter. You do get so excited in an argument." Another said, "Oh, my dear, what a complexion you have—so rosy—Why O'Cedar is certainly the best complexion salve I ever saw. Oh, you sweet kid, come and look at yourself in the mirror." Then a shout went up—"O'Cedar oil for me, and me, and me."

Prices of new shoes are skyhigh and while they remain so, you can save many dollars by having us repair your worn shoes. Especially the children's shoes, which wear out so quickly in play, should be kept in repair. We save you money and keep the family shoes looking "young."

J. A. LEMIRE

COUNCIL CONSIDERS SAW MILL AGREEMENT

The usual meeting of the Town Council was held in the Town Office on Monday evening. Present: Mayor Fawcett, Councillors Muldoon, Morris, McNichol and Gardiner.

The accounts for the month were submitted by the finance committee and passed.

Engineer Pearson was instructed to prepare an estimate of the cost of laying the necessary pipe to supply water to the cemetery and to submit the same to the council at the next meeting.

Secretary E. F. Brown read a letter from the Controller of War Trophies, stating that two German guns had been allotted to Macleod, asking that they be suitably placed and taken care of.

The monthly report of Engineer Pearson showed that the new gas burning engine had been installed to take place of the old steam engine and that it was running very satisfactorily. Mr. Pearson informed the council that the request to water users was being utterly disregarded. This will be dealt with by the council at its next meeting.

The Council will sit all day on Friday next, July 23rd, as a court of revision.

There was submitted to the council a memorandum of agreement to be entered into between the Town of Macleod and the McLaren Lumber Company, in which is embodied the requests made by the company to the council some time ago. These requests include the granting of certain portions of land, such as the old Hospital Site and a small portion of the upper end of the Island. The company also ask for certain water, light and power privileges, and for the town to bear a certain proportion of the expense incurred in building the spur from the C.P.R. tracks down to the mill site. They also ask for a final assessment for purposes of school taxes and to be relieved of municipal taxes for a definite period.

The mayor, in laying the matter before the council said that all that he had done was to embody some of the requests of the company which had been made by letter, in the form of an agreement which was the most satisfactory way of doing business. He did not think that they could come to a final decision that evening but they would know at any rate what the company were asking. So far as the town was concerned the most expensive item was the construction of the spur. This spur would pass the power house and would be of considerable advantage to the town, as it would save the town considerable expense now incurred in hauling coal, etc. The company were asking the town to pay its share which it is estimated will be in the neighborhood of \$3000 in three annual instalments. The council finally decided to lay the matter over for further discussion at a special meeting of the council to be held on Friday afternoon next, when it is hoped that they can secure the presence of Mr. H. Burns, of the McLaren Lumber Company, and go more into details.

Councillor R. T. McNichol was appointed deputy mayor for the ensuing three months.

106 YEARS OLD AND EATS ANYTHING

VANCOUVER, B.C., July 12.—"I eat anything—always have done so and always will." Thus Mrs. George de Beck, who has just celebrated her one hundred and sixth birthday, disposes of the popular theory that dieting makes for longevity.

Mrs. de Beck, the oldest woman in British Columbia—probably the oldest in Canada—still takes a lively interest in all that goes on about her, in her home and throughout the world. She is keen-eyed and vigorous, and spends much of her time in her garden. Up until the last year she has been able to read the newspapers in detail, but now she reads only the headlines. Born in New Brunswick on June 27, 1814, Mrs. de Beck was the mother of twelve children, five of whom are still alive. One daughter died two years ago at the age of eighty, and another of 79 visited her recently.

Ten per cent of the farm employees of Kansas who joined the army have returned to the farms.

TELEGRAPHIC BRIEFS

LONDON, July 14.—The British government will not fail to take suitable steps for settlement of the Shantung question, Cecil B. Harmsworth, under secretary for foreign affairs, said last night in the house of commons. The statement was made in reply to a question as to whether the government would instruct the ambassador at Tokio to urge upon Japan the advantage of immediate restoration to China of portions of Shantung which were not controlled by Germany before the war.

Mr. Harmsworth declared the government was fully alive to the advantage of a settlement of the situation. He said it was not aware of any proposal that an influential section of public opinion in Japan favors submitting the Shantung question to the League of Nations. Replying to other questions, he stated the government had received no communication from the Chinese government relating to control of the Shantung railway by Japanese troops.

—Lethbridge Herald.

WNNPIEG, July 14.—Robert Mulvey, pioneer resident of this city, died yesterday, aged 82. He served in the northwest rebellion, under Col. Scott. He is survived by one brother, Frank, of Stonewall, Manitoba, aged 99 years.

—Lethbridge Herald.

LONDON, July 14.—(By Canadian Associated Press.)—The Canada Club held a dinner last night in honor of Sir Hamar Greenwood, chief secretary for Ireland.

Col. Sir Campbell Stuart, deputy chairman, described Sir Hamar as the most important Canadian in the public service in the United Kingdom. The guests included Sir George Perley, the archbishop of Nova Scotia, the bishop of Montreal, and Col. Amery, under-secretary of state for the colonies.

Sir Hamar Greenwood, in his speech at the gathering said that all political parties were agreed that Ireland should have some form of home rule, but were against the Irish republic. A vast majority of the Irish people hated the terrorist campaign and would welcome settlement, keeping Ireland within the empire.

—Lethbridge Herald.

EDMONTON, July 13.—Premier Stewart left Edmonton on Monday for Montreal, where it is expected that he will enter in further negotiations in connection with the disposal of the Edmonton, Dunvegan & B. C. Railway. What will be the outcome is a question, but it is believed that some definite arrangements will be made as a result of Mr. Stewart's visit to the east. It is understood that the C.P.R. is now doing work on the northern line and the possibility is that the negotiations will result in the C.P.R. eventually taking over the proposition.

—Lethbridge Herald.

LONDON, July 14.—Five thousand Cossack gendarmes, under command of General Starossels, who has been appointed Persian commander-in-chief, will be sent against the Bolsheviks in the province of Mazandaran, in northern Persia and bordering on the Caspian Sea, according to a Teheran dispatch to the Daily Mail.

Officers of the British military mission who have been in charge of the administration of the second brigade of the Persian army have resigned because of their lack of official standing in view of the non-recognition of the Anglo-Persian convention until that pact is ratified by the Persian parliament.

—Lethbridge Herald.

EDMONTON, July 15.—A gypsum strike is reported from Ft. Murray, where the government salt drilling party is at work. Hon. J. L. Cote has received a wire from Prof. J. A. Allan, who is in the north on geological work for the government, that a bed of gypsum was struck during the operations on Wednesday, at a depth of 510 feet.

No information is on hand as to the character of the deposit except that it looks promising, and that steps will be taken to put a casing in at the well. The core of the drill will be brought down to the university for testing.

Mr. Cote says that the drilling for salt will be continued and that there are hopes of finding it before long. If the gypsum deposit proves to be of genuine quality and quantity, a double mining industry may presently be opened up in the McMurray district.

CHICAGO, July 15.—Prices started lower than expected today for future deliveries of wheat, the first of such prices is quoted in nearly three years. December delivery opened at 272 to 275. Estimates by traders beforehand were that the initial figures would be about \$2.80.

A rush of business came at the outset, but in a very few minutes the excitement as to wheat was ended and the uproar was greater by far in the crowds that were trading in wheat and corn. As a precaution against a wild market almost prohibitive margins were required for transactions in wheat. To this fact mainly was attributed the rapid dwindling of the volumes of business, and the quickness with which the pit assumed an every-day matter of fact aspect.

The pope's personal expenses average little more than \$500 a year.

The price of gold was fixed by international agreement in 1792 at \$20.67 an ounce.

The kilowatt hour is urged, rather than gold, as an absolute standard of value.

SUSPECTED MURDER AT BURMIS

Dressed only in a suit of union underwear, socks and garters, the body of an unidentified foreigner has been

found in a culvert two miles east of Burmis on the C.P.R. right of way, and the A. P. P. are now faced with another murder mystery. That the man was murdered seems sure from evidence found in the locality and it seems that the murder was committed near the culvert.

The dead man appears to be a Slav or Italian, and had been dragged into this three-foot cement culvert, 30 feet below the rails. When found his throat bore a deep gash. A short distance from the mouth of the culvert, T. R. Brassnet, a government surveyor, who found the body, discovered a pool of blood and hair.

There is practically nothing known about the dead man. However it is practically sure that he was not a section hand on the railroad, and the supposition that he was a miner and met with foul play at the hands of some of his companions, seems to carry some weight with the provincial police. His body is five feet eight inches in height, his hair dark and curly and his features sharp and he appears to be about thirty years of age. Indications are that the body had been in the culvert for two or three days.

The body was sent to the provincial police at Hillcrest, where an inquest was held.

Inspector Risk of "D" detachment, A. P. P. Lethbridge, is himself on the ground at Burmis conducting the investigation. Absolutely nothing has so far been found to clear up the mystery of the murdered man's identity.

LETHBRIDGE-WEYBURN LINE POSTPONED

Tanned and burned to a perfection, C. Murphy, general manager, western lines, of the C.P.R., and J. M. Cameron, general superintendent of the Alberta district, hurried into Lethbridge yesterday afternoon and announced that the Manyberries line will not be finished till fall. C. D. MacKintosh, superintendent of the Southern Alberta division, met them on the road and came to the city with them.

They were not travelling de luxe in their private cars, but were seeing southern Alberta on the truck Ford of the company. They were gaining first hand information about the condition of railroad and the crops. The Winnipeg officials have covered a great deal of the west in their present tour, touching the coast, Nelson, Moose Jaw and the country south of there. They came from Moose Jaw to Medicine Hat and took the jitney from there to Lethbridge and left here on the afternoon train for the Hat, riding in a day coach.

Mr. Murphy said: "There is not a chance in the world to get that line finished in time for the 1920 crop. I realize the farmers there have a big crop but we cannot get labor to do the work. We have not been able to complete some lines we started last year on account of the scarcity of labor."

The C.P.R. will be able to handle the crops of the west this year without any trouble, he said. "The farmers will have more trouble handling their end of it than we will," he continued.

"Crops in southern Alberta compare very favorably with what I have seen at other places," said Mr. Murphy.

When questioned about the E. D. and B. C. Mr. Murphy said he has nothing to do with that matter and therefore could not speak about it.—Lethbridge Herald.

BANK NOTES

(By Kick Me Hard)

Mr. Hill left our midst on Saturday and we now have with us Mr. Black as teller.

Miss Maggie Watson, of the Union Bank staff, left for her holidays on Thursday last, for Calgary.

Miss Fern Hovis, of the Bank of Montreal staff, is now on her vacation.

Ernie looks happy since he came back—how about the girls he met in Medicine Hat.

G. W. Romeril left to take charge of the Union at Blackie on Tuesday night.

When the Commerce blooms again we'll be there—never.

E. L. Davis is now in our midst once more, after a good time in Blairmore.

Too bad they wouldn't have you, Jock, they don't know a good man when they see him.

What will we do without Fat.

WEDDING

A very charming wedding took place in the St. Paul's Mission of the Blood Reserve, on Wednesday last, when Miss Katharine Wood was given in marriage by her father, Mr. Luke Wood, of Hazelton, to Mr. Norman Wells, of Saskatchewan. The bride was attired very becomingly in white, with a white embroidered veil. Miss Florence Wood acted as bridesmaid. Both carried a bouquet of gladioli. The groom's brother, Mr. H. Wells, acted as best man. Rev. Middleton officiated at the ceremony.

A host of friends gathered to wish them good luck and future happiness. Sincere good wishes were shown by the seemingly unfailing supply of rice and confetti with which the happy couple were showered.

Mr. and Mrs. Wells first go to Lethbridge and then to the mountains on a short honeymoon. They will eventually make their home in Saskatchewan.

CANADA'S RICH FISHERIES

OTTAWA, July 15.—Canadian fisheries for the fiscal year, which closed March last, produced a total commercial revenue in excess of sixty million dollars, or an increase of twenty-five millions, as compared with the fiscal year that closed with March 1917. The export trade in fish for the last fiscal year was worth \$40,687,172, an increase of over one hundred per cent in value, as compared with 1914. The increase over the preceding year was in excess of four million dollars.

The export trade with the United Kingdom increased from \$6,726,239 in 1914 to \$9,815,979 in the last year, while the trade with the United States jumped from \$6,644,365 in 1914 to \$17,180,250 last year. The great increase in fish sales to the United States has been due to the fact that the value of canned salmon sold to the republic in 1914 was \$115,360, while last year it was \$12,067,319. During a span of six years there has been a jump of nearly three hundred per cent in the value of dry salted cod, ling, hake and pollock shipped into the United States.

Trade With United States
Trade authorities look with some disfavor upon the increased fish trade with the United States because a large quantity of salmon and other fish imported from Canada is exported again. Statistics indicate that the premium on American money is at-

UNITED STATES PROPOSES TO ESTABLISH A STATE OF ZION

By Payne

LONDON, July 7.—A practical program of construction for a state of Zion in Palestine, prepared by the American delegation of 42 has been accepted by delegates to the Zion conference from England and the British Dominions, including Canada. British delegations have been in conference for two days. The Americans engaged in a whirlwind campaign to put over this plan. The result was that when the conference was called today, all the English speaking delegates united in support of the American proposals. These include the sending to Palestine of a large unit of engineers and scientifically trained men to plan railroads, lay out cities, locate factories, design buildings, test its soil for the best possible crops, build irrigation dams, ditches, and do all things needful to prepare the promised land for a new population of many millions.

Conference Personnel Compete
With the arrival yesterday of Polish and other Continental delegates, the personnel at the conference is complete. The leaders include Dr. Max Nordau, Dr. S. E. Sokine, of Jewish national fund commission and Dr. A. Saphir. On the eve of the meeting Dr. Max Nordau, outlined his view on the problems of immigration which he regards as the most important. "Zionism stands or falls with the Jewish majority in Palestine. We are now all over the world an insignificant foreign element in the midst of strange nations. No toleration is even granted our religious and national rights. The fundamental problem therefore is the speedy mass immigration. Dr. Nordau thinks the hardships of the task have been greatly estimated.

The Immigration Problem
"Undoubtedly millions of Jewish brethren are feverishly awaiting to be saved from massacres and persecution by emigration to Palestine. The prevalent opinion that these people have been cared for, and financed from first to last is untrue. When the big stream of immigration to America began in 1881, immigrants didn't want any organizations to watch their early steps in a new country. They found their own way and through their own industry and energy, created their own possibilities. Our own people can solve any problems. I have sufficient faith in the vitality of our race to believe they can accomplish this as they have other heroic tasks of the past. The problem of the soil is regarded as of the next importance.

Zionist organization must acquire from the British the administration of all land not privately owned, land formerly belonging to the Turkish government, but now the property of the British crown. We must have this land to divide into homesteads for the immigrants who will undertake the work of development.—Calgary Herald.

tracting Canadian trade to the exclusion of other markets.

"While United States firms have agents abroad building up future trade, Canadians," remarks an official statement, "are content to sell to the United States. They seem not yet to have appreciated the fact that the premium on American funds gives Canadian exporters in foreign markets an advantage over their American competitors to the extent of the premium. The warning given recently by a Canadian bank, that Canadians are letting slip by the opportunity to build up Canadian trade, would seem to be applying just now to the fishing industry.—Calgary Herald.

A compound called "fire snow" has been invented for extinguishing oil blazes.

HELP YOUR PROVINCE

6 PER CENT.
GOLD BONDS

By purchasing bonds of the Province of Alberta.

While securing the highest class of investment procurable you at the same time aid your Province to provide for the building of its Public Works and Telephones in the most effective way.

Financing by the issue of bonds within the Province results in the distribution of the Interest amongst our own people.

If you encourage this idea, you help your Province to become less dependent on outside money markets.

Interest is payable half-yearly—1st of May and 1st of November—by coupon.

Bonds are in denominations of \$100, \$500 and \$1,000.

Remittances should be made by marked cheque, money order or postal note.

These Bonds may also be obtained from any recognized Bond House in the Province of Alberta

Write for fuller information to Deputy Provincial Treasurer.

HON. C. R. MITCHELL,
Provincial Treasurer.

LOCAL AND PERSONAL

Born on Monday July 19th, to Mr. and Mrs. Macro, a son.

Rev. W. A. Lewis was a visitor to Lethbridge on Tuesday.

Miss Ethel Cahoon, of Stand Off, left on Monday, for a few day's visit to Lethbridge.

Mrs. (Rev.) W. A. Lewis and Miss Pauline Lewis are away on a few day's visit to Coleman.

Mr. and Mrs. W. Fleming and family were visitors to the Waterton Lakes on Sunday.

Mrs. John Hart and her two daughters left on Friday to spend their summer vacation at Vancouver.

Miss Madge Benson, of Nobleford, and her sister, Vera, of Macleod, left on Sunday for a holiday trip to Vancouver.

There will be another dance at the Mud Lake School house on Tuesday, July 27th. Lots of good music and a good time.

It is reported that the Hutterite Brethren have an exceedingly fine stand of wheat on their farm on the Stand Off Trail.

Mrs. D. C. Jones and Mrs. L. Faunt Jones of Edmonton are spending a holiday in Macleod the guests of Mrs. A. M. Small.

Mr. James Davey, of the C.P.R. left on Saturday morning for a three week's trip to Vancouver, Victoria and Seattle, via the Kootenay Lakes.

The Forestry Car will be in Macleod on Saturday, July 24, every person interested in tree-planting should make a point of being in town on that day.

E. J. Young, of the Bank of Montreal Staff, returned on Thursday evening from his summer vacation, spent at Calgary, Edmonton and Red Deer.

Mrs. R. Y. Douglass, of the R. C. M. Police Barracks, has returned home from a visit to Mrs. J. W. McDonald, who is spending the summer at her cottage at Gull Lake.

There was a slight thunderstorm passed over the district south of town on Sunday but no damage is reported. The crops around Allenfield are in splendid condition since the rains, and good average harvest is expected.

J. W. McDonald, K.C., returned from Gull Lake on Friday last. Mr. McDonald reports that crops in that district look fine, and that conditions north of Calgary only emphasize the necessity and urgency of irrigation in Southern Alberta.

Little Ross Macdonald, the three-year-old son of Mr. and Mrs. G. Macdonald, was the victim of a serious sunstroke on Friday evening last. The little fellow had been playing vigorously in the sun and finally was overcome with the heat. Happily he is steadily recovering.

Benson & Greenwood have shipped out another car load of bones this week for which they have paid out another \$1000. By a typographical error in last week's issue it appeared as if the price for a car-load of bones was \$100—it should have been \$1000. It is surprising what a difference the dropping of a cypher makes.

Mr. W. J. Presley and a party of relatives and friends came into Macleod on Sunday last, and on the way home they found that as the result of the storm the roads were greasy and slippery, and about six miles out the car struck a culvert and turned off the road, breaking the wind shield, front axle and the radius rods. Some of the occupants were thrown out, but beyond a few painful cuts and bruises no serious injuries were incurred.

R. T. McNichol was a visitor to Winnipeg last week, as delegate to the Postmasters' Convention held in that city. Previous to the convention a committee of the Postmasters' Association, of which Mr. McNichol was a member, waited upon the government at Ottawa, asking for a general improvement in the treatment of postmasters, especially in small towns and rural districts and for an in-

crease in salaries, which at the present time are ridiculously low.

T. B. Martin leaves on Wednesday to spend his vacation at Gull Lake.

Mrs. W. Kyle left Macleod on Wednesday to join her husband at Elcho.

Mrs. R. C. Perry, of Lewistown, Montana, is visiting her brother, F. Ryan.

Miss Margaret Watson, of the Union Bank staff, is holidaying in Calgary.

Mrs. A. F. Grady and Ralph are spending their summer vacation at Gull Lake.

Johnny Pringle with his wife and family left for Waterton Lakes on Sunday morning.

A. B. Stellar, formerly of Great Falls, has joined the mechanical staff at the Midland Motors.

Mrs. A. Dunn of the Town office returned to Macleod on Friday after visiting friends in Calgary.

Mrs. D. R. Carse and the children are visiting a brother, Mr. J. Miller, at Crossfields for two weeks.

Mrs. L. C. Jones, 23rd St., left Monday night for Saskatchewan, on an extended visit to her daughters.

Chas. Murdock, who was former yardman is now in charge of the retail department of the McLaren Lumber Co.

Mr. and Mrs. F. Cutler, the popular musicians at the Empress, were holidaying last week in the neighborhood of town.

Miss E. Williams who is teaching school at Bashaw is home for her vacation with her mother, Mrs. James Williams.

Miss Nora Brown, of Macleod, and Miss Mackintosh, of Nobleford, accompanied Miss Vera Benson to the coast this week.

Mr. Hill, the teller in the Bank of Commerce, is away on his summer vacation spending part of the time at Regina and part in Spokane, Wash.

Murray Gardiner of the Merchant's Bank at Red Deer, is spending his summer holidays in Macleod with his parents, Mr. and Mrs. R. J. E. Gardiner.

Miss V. Parker, of Reach & Co.'s staff, returned to Macleod on Sunday last, after a delightful holiday spent at Cardston, Waterton Lakes, Medicine Hat and Lethbridge.

Capt. F. M. W. Harvey, V.C., M.C., accompanied by Mr. T. W. Franks, formerly barrister in Macleod, is visiting for a few days with Mr. Robert Patterson, at Slideout.

A hail storm passed over a small area south of town on Sunday evening doing a little damage to some of H. Rands, J. Beattie, Nicholas Oski, Jardon and Brownlee's crops.

A. D. Ferguson's drug store has a very attractive window display featuring the Jontel toilet preparations and inside the store is an illuminated hanger beautifully colored and operated on an intermittent switch, also advertising Jontel preparations.

In the excitement of a game of bowls in the Ontario Bowling association's annual tournament the other day Trooper W. Hart, who was playing with a rink from the Davisville military hospital, Toronto, suddenly recovered his speech which had been seriously impaired by shell shock in the war. For the first time in two or three years he can speak without difficulty.

WESTERN FARMERS MAY MARKET THEIR OWN WHEAT

The formation of a co-operative farmers' pool to deliver the Canadian wheat crop of 1920 to the markets of Europe may be the outcome of the decision of the government to make the wheat board inoperative.

This is the proposal made by the directors of the United Farmers of Alberta at a meeting in Calgary on Saturday, when they decided to request the United Grain Growers, Ltd., and the Saskatchewan Co-operative

STOCKTAKING SPECIALS

During Stocktaking we are continually throwing out for quick clearance oddments and remnants at Sacrifice Prices. The Sale of these oddments and Remnants will continue all this month.

WHITE SUITING 25c YARD—

Fine White Suiting with narrow self stripe. 36 inches wide. Dandy summer material, usual 40c per yard—

In dark shades of brown and red. Good quality goods, just the thing for kitchen use. 45 inches wide, usual 65c yard—

Special, Yard, 39c

FINE REPP ONLY 35c YARD—

Very fine grade Repp made from finest cottons, 30 inches wide, comes in white and cream shades only; no dressing. Usual 50c per yard—

To Clear, Yard, 35c

All Oddments and Remnants HALF PRICE

The Hudson's Bay Company

Elevator Company to consider the feasibility of forming such a pool in the event of the dominion government adhering to its decision. The directors will first make every effort to have the board continued for another year as now constituted.

The resolution passed by the directors reads in full as follows:

"Whereas the Canadian government has announced that the Canadian Wheat Board will not be continued for the marketing of the 1920 crop, and Whereas this board of directors of the U. F. A. are of the opinion that the wheat board should be continued for the marketing of the 1920 crop in order that the farmer may receive the full value of his product in the world's markets."

"Therefore be it resolved that this board of directors use every influence to have the wheat board as at present constituted continued for another year, and failing that

"That we request the directors of the United Grain Growers, Ltd., in conjunction with the directors of Saskatchewan Co-operative Elevator Co. Ltd., for the purpose of delivering our farmers' wheat direct to the European markets."

The two big farmers companies referred to handle the greater portion of the wheat crop of Canada. A wheat marketing pool organized by them would be the greatest wheat selling agency, apart from the purely governmental institutions operated during the war to meet war conditions, that the world has seen.

Farmers Are Opposed

That a great proportion of the or-

ganized farmers of Western Canada are opposed to the re-opening of the grain market seems to have been demonstrated during recent weeks when the continuance of the board as at present constituted has been called for by a number of farmers' conventions. The Canadian council of agriculture passed a resolution favoring the continuance of the board for another year one or two days before the announcement from Ottawa that the board will be discontinued. The announcement of its discontinuance created a storm of indignation at the convention of the Bow River U. F. A. political association in Calgary on Friday. The delegates immediately protested, and called upon the U.F.A. directors to take steps to secure the co-operative marketing of the 1920 crop by the farmers' organizations now that the government has withdrawn its support of this method of selling.

Wheat Board Popular

The wheat board has been steadily growing in popularity among the farmers since last winter, when among a section of the farmers it was one of the most hated institutions in Canada. It was one of the main issues at the annual convention of the U. F. A. in January. At that time an assault was made upon the board by a group of farmers, small in numbers, but of considerable influence. H. W. Wood, who in addition to being president of the U.F.A. is a member of the wheat board, made an explanation of its operations and methods which completely changed the situation, and the convention by an over-

whelming majority called for the board's continuance for another year. One of the principal criticisms offered at that time was the secrecy with which the selling operations were conducted. "If you had a man playing poker with your money, would you ask him to play with his cards on the table facing upwards?" was the answer to the criticism.

When the successive announcements of the probable value of the participation certificates were made showing that the farmers would receive a much larger return than they had anticipated, it was found that a considerable number of them had disposed of their certificates at a figure as low as five and in some cases two cents a bushel. Letters from the less reputable grain companies in which they urged their agents throughout the west to purchase all the certificates obtainable at low prices were brought to light. The opinion became widespread that many of the attacks on the wheat board had been inspired by such agencies and that the object was the victimization of the farmers.

The actual arrangements for the selling of the 1919 wheat crop were carried out by James Stewart, who has spent some years in the grain business and during the war had served the war agencies purchasing for European governments. Several of the resolutions carried by the farmers have laid emphasis on the importance of retaining Mr. Stewart as chairman of the board, as the general opinion is that the success of the board's operations has been mainly due to his handling of the sales.
